

WHILE-LOOP CONDITIONS

```
while(*true*) {
```

```
// this code
```

```
}
```

```
while(*false*) {
```

```
// this code
```

```
}
```

When condition is always true

*Infinite Loop occurs, code  
never exits the loop!*

When condition is false

*Code inside the loop never  
executes, just gets skipped  
over!*

# WHILE-LOOP EXAMPLE

Counting up from 1 to 5
